Certification of Compliance - Domestic Water Supply Solder & Anti-Scald/Thermal Shock Prevention

Building Permit #: _____ Date: _____

Property Owner: _____

Property Location: _____

Installer/Plumber: _____

Address and Telephone: _____

Suffolk County License Number: _____

I hereby certify that the solder used for the domestic water supply lines in connection with the above referenced building permit conforms to the applicable requirements of the New York State Uniform Fire Prevention and Building Code as printed below.

902.2 PROTECTION OF POTABLE WATER SUPPLY.

902.2(a) TOXIC MATERIALS.

902.2(a)(1) No piping materials that could produce toxic conditions in the potable water supply system shall be used in such system. All parts or components of a water distribution system whose surfaces come in contact with potable water including but not limited to piping, fittings, storage tanks, plumbing fixtures and equipment shall contain not more than 8.0 percent lead. For lead content in solder see section 905.5 of this Title. [EFFECTIVE NOVEMBER 1, 1989]

905.5 COPPER TUBE SOLDER JOINTS. Surfaces to be soldered in copper tube solder joints shall be cleaned bright, properly fluxed, and the joint made with solder approved for such use. Lead content in solder and flux shall be limited to 0.20 percent. [EFFECTIVE NOVEMBER 1, 1989]

I further certify that an anti-scald and/or thermal shock preventing device has been installed in conformance with all applicable requirements of the New York State Uniform Fire Prevention and Building Code as printed below.

902.6(k) Anti-scald and/or thermal shock preventing devices shall be installed in the water supply to individual bathing and/or showering fixtures to provide a reasonably safe degree of control from excessively high water temperatures. The devices shall be of pressure balancing, thermostatic mixing or combination pressure balancing/thermostatic types conforming to reference standard RS-33-25. [ADDED EFFECTIVE JULY 26, 1995] <ALSO SEE DHCR NOTICE>
